

Chromacol has been involved in the design and manufacture of vials, caps and seals for chromatography for almost as long as chromatography has been used as an automatic analytical technique. Therefore Chromacol is able to offer the most suitable combinations for the most popular instruments currently in use.

Select™ is a range of new low cost convenience kits for chromatography autosamplers. Each box contains 100 vials, caps and seals in a new "clam-shell" pack made from specially selected chromatographically clean materials. The contents have been carefully chosen to match the needs of particular autosamplers. All the analyst has to do is remember is the name of the autosampler to be used. No long product codes are needed only the initials of the instrument in use. For example, to order 1000 vials, caps and seals for a Shimadzu gas chromatograph the reference would be SHG.

	Gas Chromatography	Liquid Chromatography
Perkin Elmer	PEG	PEL
Agilent	HPG	HPL and HPLS (for I 100)
Thermo-Finnigan	TQG or TTR (for Trace)	TQL
Shimadzu	SHG	SHL
Varian	VAG	VAL
CTC/Leap	CTCG	CTCL
Waters Alliance		WAL
Merck-Hitachi		MEL
Spark		SPL
Dionex		DIC (for IC)

The added convenience of having a matching quantity of vials and caps, at no extra cost, in one case means that large quantities of vials and pre-assembled caps are not left open to contamination prior to use. Each pack is labelled with the production batch number to ensure batch traceability.

Other combination packs are available to fit other instruments:

PART NUMBER	DESCRIPTION
2-CV7-CP	10 packs of 100 2mL clear, crimp top vials, with rubber/PTFE crimp caps
2-CV(A)7-CP	10 packs of 100 2mL amber, crimp top vials, with rubber/PTFE crimp caps
2-CVST-CP	10 packs of 100 2mL clear, crimp top vials, with silicone/PTFE crimp caps
2-CV(A)ST-CP	10 packs of 100 2mL amber, crimp top vials, with silicone/PTFE crimp caps
2-SVW8-CP	10 packs of 100 2mL clear, screw top vials, with rubber/PTFE screw caps
2-SVW(A)8-CP	10 packs of 100 2mL amber, screw top vials, with rubber/PTFE screw caps
2-SVWST-CP	10 packs of 100 2mL clear, screw top vials, with silicone/PTFE screw caps
2-SVW(A)ST-CP	10 packs of 100 2mL amber, screw top vials, with silicone/PTFE screw caps
2-SVJ(W)101-CP	10 packs of 100 2mL clear, screw top vials, with silicone/PTFE screw caps
2-RV8-CP	10 packs of 100 2mL clear, snap top vials with rubber/PTFE snap caps
2-RVST-CP	10 packs of 100 2mL clear, snap top vials with silicone/PTFE snap caps
2-SV101-CP	10 packs of 100 2mL clear, screw top vials with silicone/PTFE screw caps
06-PESVI4X-CP	10 packs of 100 600µL polyethylene, screw top vials with pre-cut silicone/PTFE screw caps

*These vials, designed to use the 8-SCJ type caps must be used with our standard 2-SV vials not the wide neck versions as used in the other packs.
