

These autosamplers require the use of a pre-cut seal which means our 11-AC-ST101X and 8-ST14X products are suited to these autosamplers. Merck/Hitachi have a wide variety of racks so they are compatible with a wide variety of vials. The 03-CVG, 02-CTVG, 02-CTV(A) and 01-CVG vials may be used in some trays without a support sleeve. The 2-CV crimp top vial and the 11-AC-ST101X caps are included in the Instrument Select kit – product code MEL.
